

CLAIMS

What is claimed is:

5 *Sub B17*

1. A personal safety signaling apparatus comprising:

first wireless communication means, said first wireless communication means for transmitting an emergency radio signal;

an activation means for initiation said first wireless communication means;

a first wireless link for receiving said emergency radio signal, said first wireless link capable of communicating the presence of said emergency radio signal to a central monitoring station via a second wireless link;

10 *Cont* said central monitoring station capable of determining the location of said first wireless link via triangulation of said emergency radio signal, said central monitoring station further capable of alerting an emergency response vehicle via an otherwise conventional alerting method.

15

2. The personal safety signaling apparatus of claim 1, further comprising:

a microphone, and

a second wireless communication means, said second wireless communication means capable of communicating audible input acquired by said

*B1
Concl.* microphone to said first wireless link.

3. The personal safety signaling apparatus of Claim 2, wherein said first wireless link comprises a cellular telephone signal receiving tower.

5 *Sub B17*

4. A personal safety signaling apparatus comprising:

first wireless communication means, said first wireless communication means for transmitting an emergency radio signal;

an activation means for initiation said first wireless communication means;

a first wireless link for receiving said emergency radio signal, said first wireless link capable of communicating the presence of said emergency radio signal to a central monitoring station via a land based link;

said central monitoring station capable of determining the location of said first wireless link via triangulation of said emergency radio signal, said central monitoring station further capable of alerting an emergency response vehicle via an otherwise conventional alerting method.

10

15

*Sub B17
Cont*

5. The personal safety signaling apparatus of claim 1, further comprising:
